Description

- Validate the fields - it includes checking mandatory fields, character checking, length checking and error messages.
- Check the app's scrolling functionality.
- Check whether the entire application has unified and eye-catching colors.
- Check if the text of error messages are user-friendly and identical for all fields.
- Check if the application is compatible with different screen sizes, resolutions.
- Check if the application has a strong password policy.
- Check whether the application has implemented an appropriate mechanism for retrieving forgotten passwords.
- Check if deactivated users and users entering old passwords are able to log in.
- Check if currency symbols and numbers are formatted correctly.
